# *Infinity Luxury Philosophy*

---

We believe that every house, hotel, or beach deserves to be special.

With passion and care, we are creating contemporary products through innovative ideas, a modern and elegant design, made with durable and high-quality materials. Our custom made production allows you to create unique, personalized products by choosing between three materials: natural stone, ceramics, and HPL.

---

# About us

---

Since June 2017, our young and dynamic team has been working together towards our goal of becoming a world-leading brand in luxury outdoor furniture.

Keeping a positive environment in our company, with a focus on continuous growth, is of great importance to us. Each team member is different and unique, but we all have the same hard-working mindset. We truly believe in ourselves, and in our products.

---

*"Without passion, there is no emotion. The happiness and satisfaction of the people who believe in us is our passion and motivation to create something different."*

*Stefano Ladavac, CEO and co-founder.*

---

# The value

---

The value of our product is expressed in the experience we provide to the client when creating the shower itself, as well as during the shower. What distinguishes our shower from others is the personalized approach in designing.

Creativity is the ability to generate novelty and execute new ideas in a way that will improve people's lives. That is something we are truly passionate about in Infinity Luxury. To be original, innovative and to satisfy the specific needs of our customers.

---

*'Freedom is realizing you have a choice.' - T.F. Hodge*

---

# Perfectly manufactured

---

Dedicated to professionalism, we take care of every single detail. When the shower is finished, it looks like it has been made from one piece.

---

*Precision and perfection  
in each detail.*

# We care

---

During the process of creating a shower, we are guided solely by the goal of satisfying the client's wishes and needs. Caring about our clients and expressing their personality through the shower, we bring every client's wish to a realization. While doing that, we strive not to have a negative impact on the environment and its resources. Keeping in mind the importance of water conservation, we have implemented a system to reduce water consumption by up to 50%.

# Modern design

---

We are following today's trends in architecture: a minimalistic design with straight lines and lots of white and grey. The color tones, materials, shapes, and sizes are directing a person's thought towards the purchase. We strive to create a product with a designed appearance and function that expresses our personality and tells its own story.
