Control Station

MAKING YOUR POOL MAINTENANCE EASIER

CONTROL STATION IS A CONNECTING BOX FOR CONTROLLING ALL YOUR POOL EQUIPMENT:

filtration, heating, lighting, water features, etc.

Filtration

Chlorine

Control Station **optimises your pool treatment.**

In real time:

- it measures pH and ORP (water oxidation potential measurement),
- it injects disinfectant (liquid chlorine, bromine).

Conclusions?

- you **delegate repetitive and technical tasks,**
- you **enjoy continuous control and automatic regulation** for improved disinfectant management, thus avoiding "shock" treatments.

ABSOLUTE COMFORT

Without leaving your seat*, you can easily use your smartphone or tablet to:

- program your equipment,
- use manual mode to control all your equipment's (increase temperature, switch lights on, stop filtration, etc.),
- check the main information,
- receive operating alerts (temperature, pH, etc.).

CONTROL STATION, A COMPLETE SOLUTION

It includes the box, the Wi-Fi module, the temperature sensor, two peristaltic pumps, 5 equipment connection relays.

Control Station can be fitted with the optional free chlorine measuring probe.

*The application is intuitive and allows remote pool control (via a mobile, PC, etc.).

Download the Hayward PoolWatch application

2 YEARS WARRANTY + **1 YEAR** if purchased from a "Totally Hayward" pool distributor

GOOD TO KNOW

Control Station is compatible with HAYWARD® or other brand products.
